

Installing the Advanced Shipping Module

Download the module from the App Store.

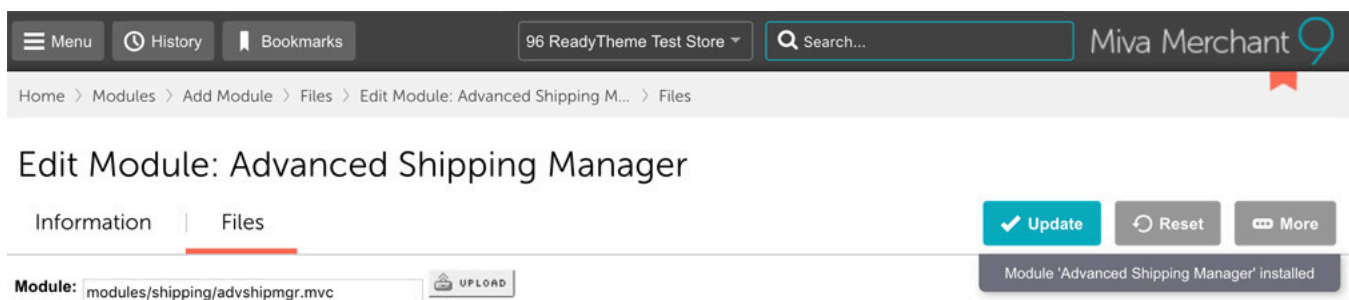

In your Store Admin, click on the “Menu” button and scroll down to “Modules.”

Click on the “+” icon on the top right.

Navigate to your module and upload it to the Admin.

Now that your module is uploaded, click on “Menu,” then scroll down to “Shipping Settings.” Go to the far right and click on the “...” and scroll down to “Add/Remove Modules.”

Home > Shipping Settings > Shipping Method Rules

Available Modules

Advanced Shipping Manager Version: 1.0000 Provider: Miva Merchant Provides real-time shipping rates through Advanced Shipping Manager Web Service. <input type="button" value="Install"/>	Base + Weight Shipping Version: 9.0004 Provider: Miva Merchant Use this module to generate simple shipping charges based on the weight of the order. The Base Charge is a flat rate applied to all orders using this shipping method. The Amount/Weight Unit is the price you want to charge per weight unit. Set the weight unit (for example, pounds or kilograms) in the Edit Store > Settings tab > Weight Units drop-down list. The total shipping charge is [base charge] + [(weight of order) X (shipping charge per unit weight)] <input type="button" value="Install"/>	Canada Post Version: 9.0005 Provider: Miva Merchant Use this module to enable Canada Post for shipments originating in Canada. You must have a Canada Post account before using this module. You can use this module to get shipping rates and to print labels with postage. Development Mode generates free test labels that cannot be used for shipping. Production Mode prints real shipping labels that will be billed to your Canada Post account. Note that the settings are global and will apply to all packages that you ship by Canada Post. <input type="button" value="Install"/>
--	---	--

Note: for this module there are no Shipping Rules or Global Settings in Miva. The only settings in Miva are at the Product Level.

Description:

- Categories
- Price Groups
- Upsold Products
- Gift Certificate Sales
- URIs
- Digital Download Settings
- Digital Downloads
- Subscription Terms
- Subscriptions
- Custom Fields
- Advanced Shipping Manager**

There are custom fields that you can fill out for specific products. If you're not sure what they are, you can hover over the "?" and a "Tool Tip" will appear letting you know what that field is for.

Dimensions:

Free Shipping:

Free Shipping Methods:

Ship Rate:

Flat Ship Rates:

Origin Zip:

Number of Boxes:

Multi Box Weights:

Multi Box Dimensions:

Involvement Methods:

Markup:

Global Free Ship Exclusion:

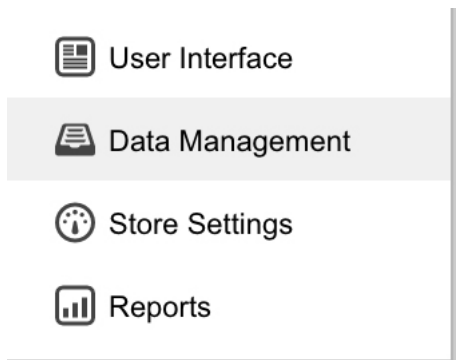

Exclude States:

Exclude Countries:

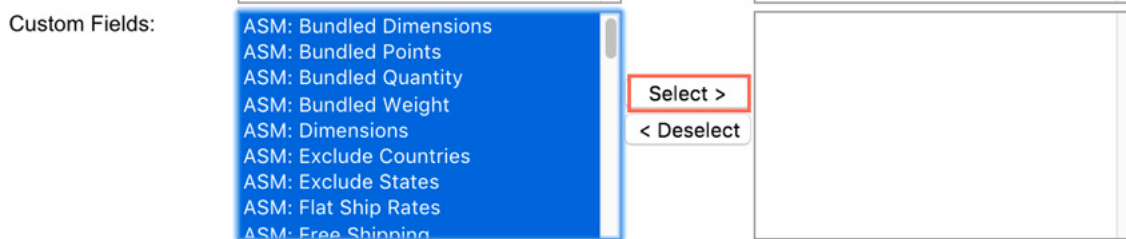

Enter the 3 dimensions of the package. Each dimension should be separated by a space. The order is length, width, height. Please note that an item with 2 dimensions automatically sets the Ship Alone variable to Yes, as there is no mathematical way to combine dimensions.

The most efficient way of setting up rules for all or a large majority of your products is through Data Management. Here's how to do that:

Click on "Menu" then scroll down to "Data Management."

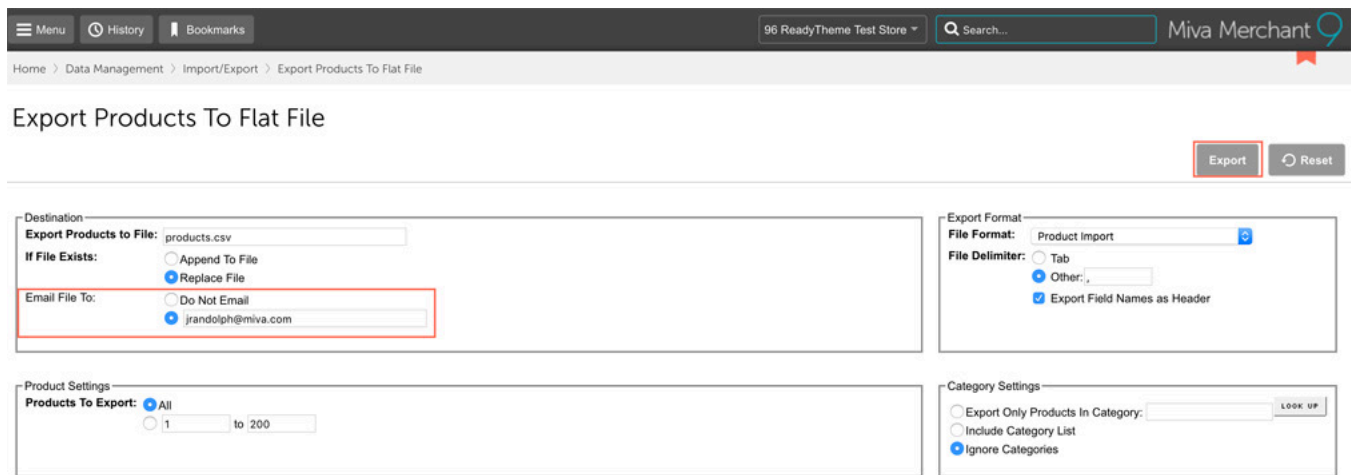

Scroll down to "Export Fields" and highlight all the "ASM" custom fields.

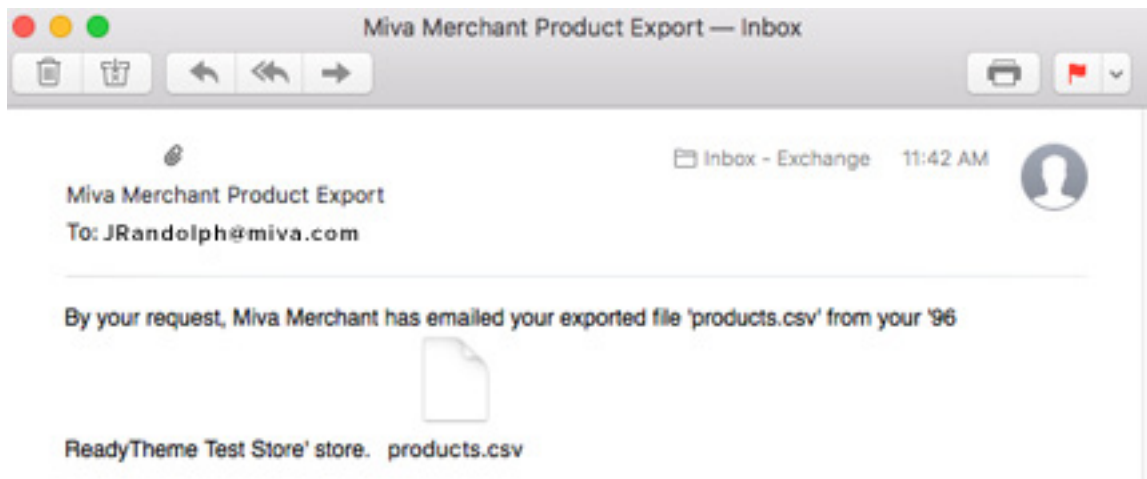

Then click on the “Select” button and “push” them over to the other side.

Fill out your email address if you would like the flat file exported to your email. Then click “Export.”

A spreadsheet will be sent to your email address:

You can then edit the spreadsheet and when you’re done, upload it back through the same Data Management area.
