Update Navigation: All Categories

UNDER THE NAVIGATIONS SETS TAB

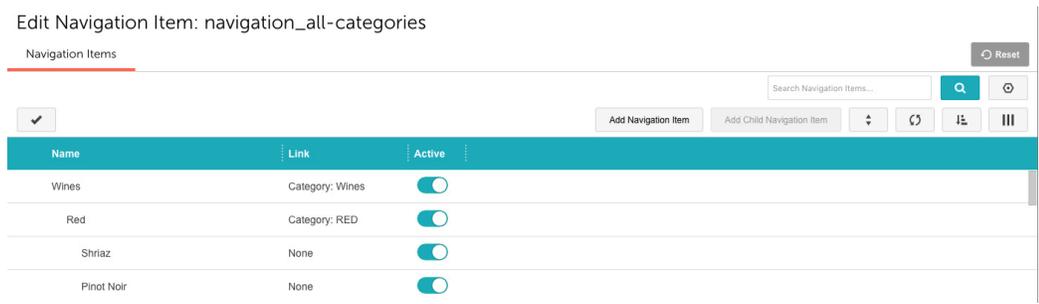

The DiVino ReadyTheme has a very robust menu. The Nav: All Categories is not only a drop down, but it also expands to show multiple sub level categories. We recommend no more than 5 or 6 to keep the site manageable and clean. Here’s how to update the menu:

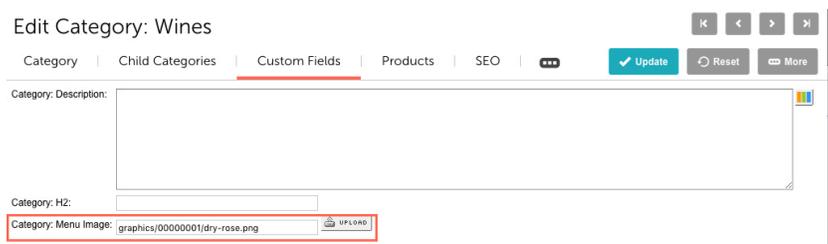

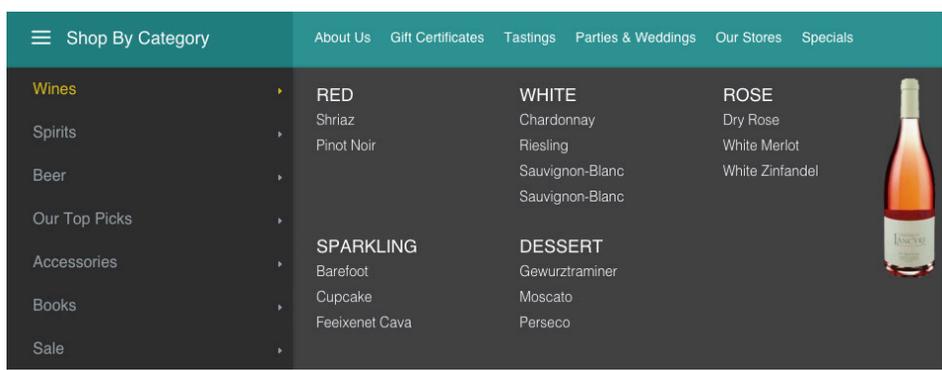

1. Click on “Menu” then scroll down to “ReadyTheme”
2. Click on the “Navigation Sets” tab
3. Click on “Navigation: All Categories” then click on the “Edit Navigation Item” icon

4. Here you’ll see the menu with the navigation items and child navigation items. You can add, delete, turn off or turn on whichever categories you want.

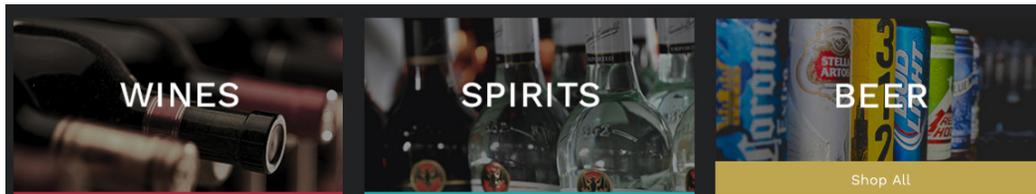

You can display an image in the “Navigation: All Categories” ReadyTheme Navigation Set for any of the 1st-level Navigation Items with a Category link-type (ex. See below: Living, Bedroom, Dining, Office, etc.) The image comes from that category’s “Menu Image” (menu_image) custom field.

Update Storefront Promo Left, Middle & Right

UNDER THE “IMAGES” TAB

370x200 is the recommended size for the Storefront Promo images. To swap them out:

1. Click on “Menu” then scroll down to “ReadyTheme”
2. Click on the “Images” tab
3. You’ll see the three Storefront Promo Images listed. Click on one and then click on the pencil or edit tool.
