

# Miva Merchant 9

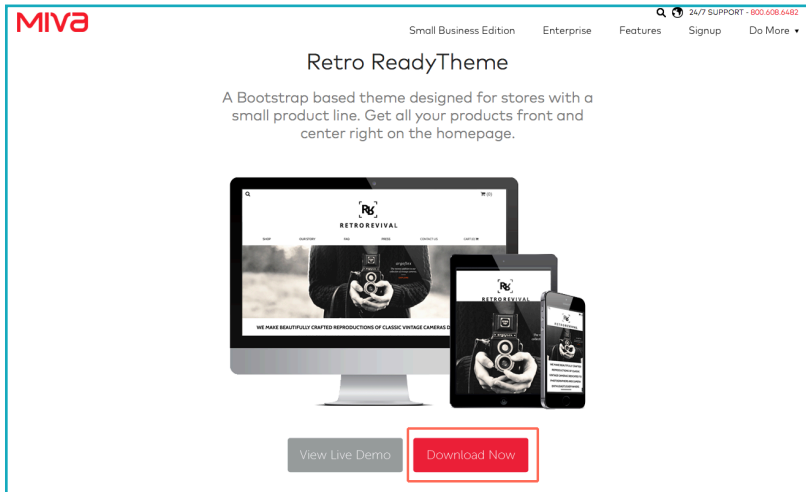

**RETRO READYTHEME CUSTOMIZATION**

Updated November 12, 2014

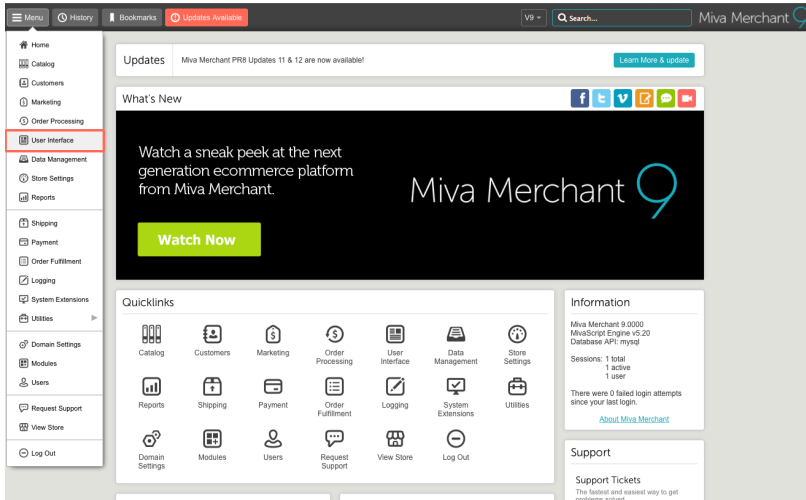

# Installing the Retro ReadyTheme

These instructions are for installing a ReadyTheme to a brand new store. If you have an existing store, please contact support.

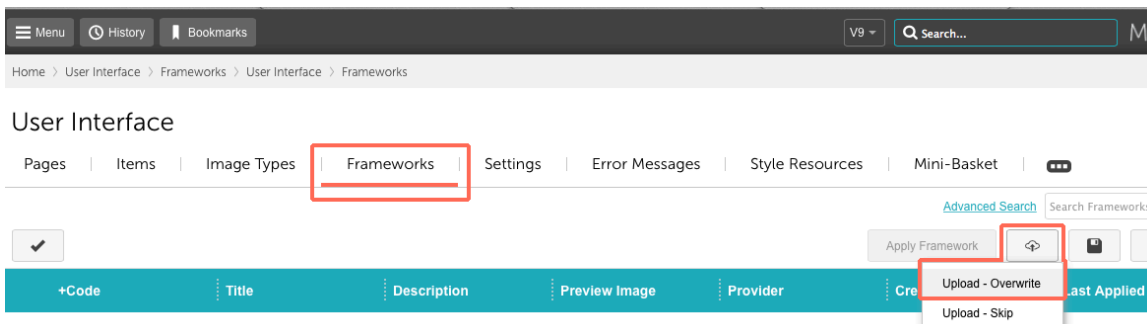

1. Got to [http://www.miva.com/mm5/merchant.mvc?Screen=readythemes&Store\\_Code=MIVA](http://www.miva.com/mm5/merchant.mvc?Screen=readythemes&Store_Code=MIVA) and download the theme you want. For this guide we are downloading and installing the Retro ReadyTheme.

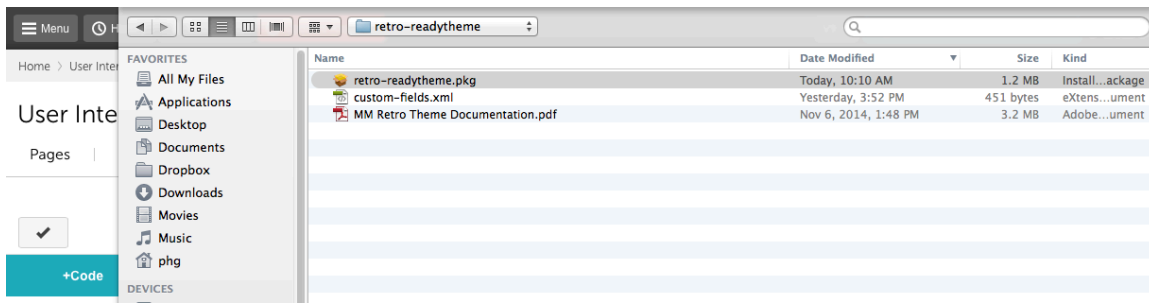

2. Go to your Miva 9 Admin, click on Menu, scroll down and select "User Interface."

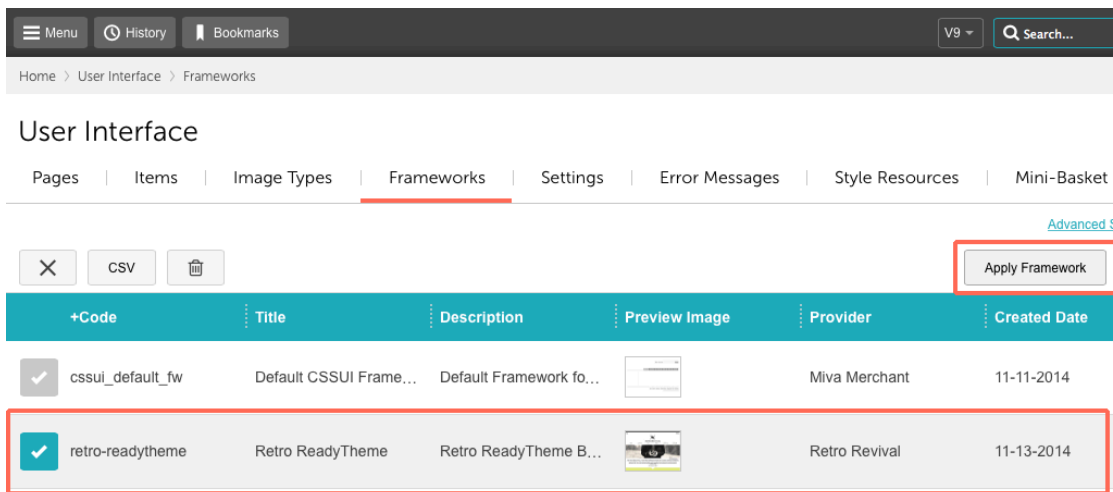

3. Select Frameworks, click on the upload button, select "Upload-Overwrite."

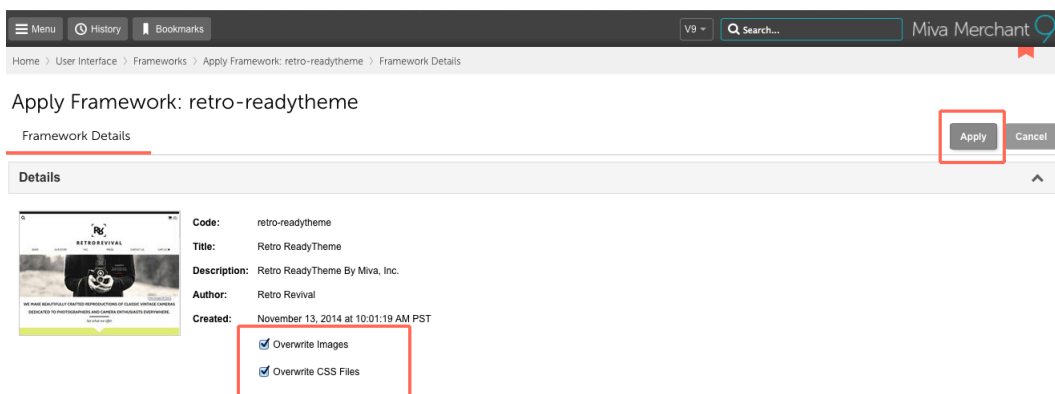

4. Go to your downloads file, open the readytheme folder, and select the .pkg file, then select “Choose.”

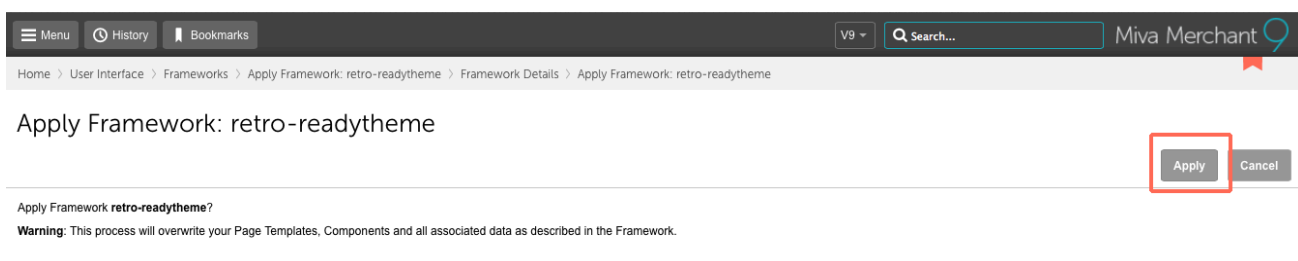

5. Click on your ReadyTheme, Click “Apply Framework.”

6. Click the two boxes, “Overwrite Images” and “Overwrite CSS Files”, then click “Apply.”

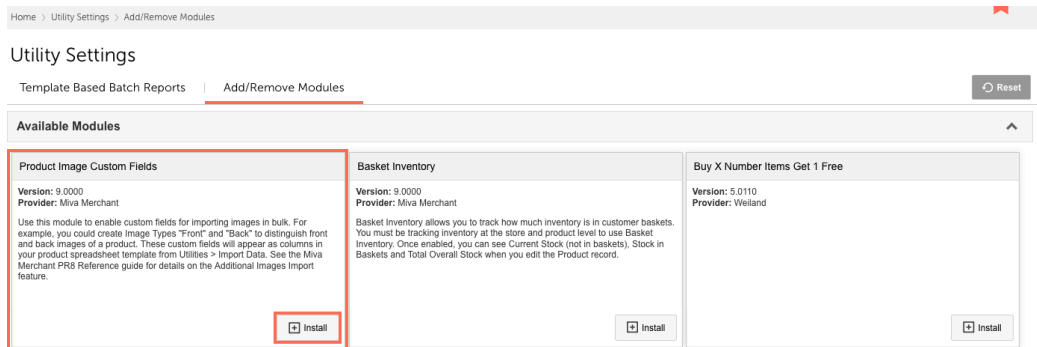

7. A secondary warning page will come up, go ahead and hit “Apply” one more time.

## 8. Install Product Image Custom Fields

This may or might not need to be done, depending on future updates for this theme. Go to Utilities, Add/Remove Modules and see if "Product Image Custom Fields" is in the "Available Modules" area. If it is, click on the install button. If it's down below under "Installed Modules" then you can skip to the next step.

## Install XML file for Product Custom Fields

The Prepworkx Theme, in addition to the pkg file, also has an excel file that needs to be uploaded and installed. This excel file will allow you to add four custom text fields:

Product Type and Short Description on the Storefront page

**LALIYA** \$599.95  
MEDIUM FORMAT SLR

QTY  [ADD TO CART](#)  
[ADD TO WISH LIST](#)

**OVERVIEW** [show less -](#)

Quidque scripta iudicari istis. Petulantes, solitudo claudicare.

## Specs and Options on the Product Page

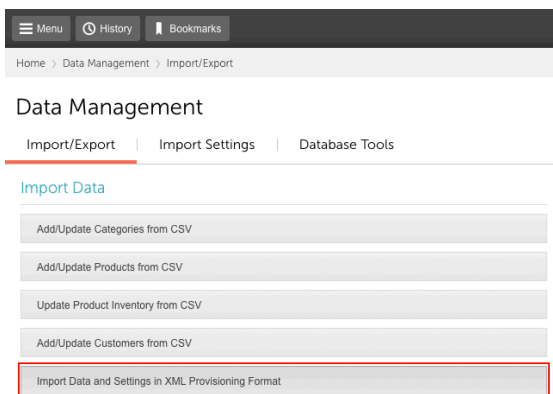

Here's how to install this file:

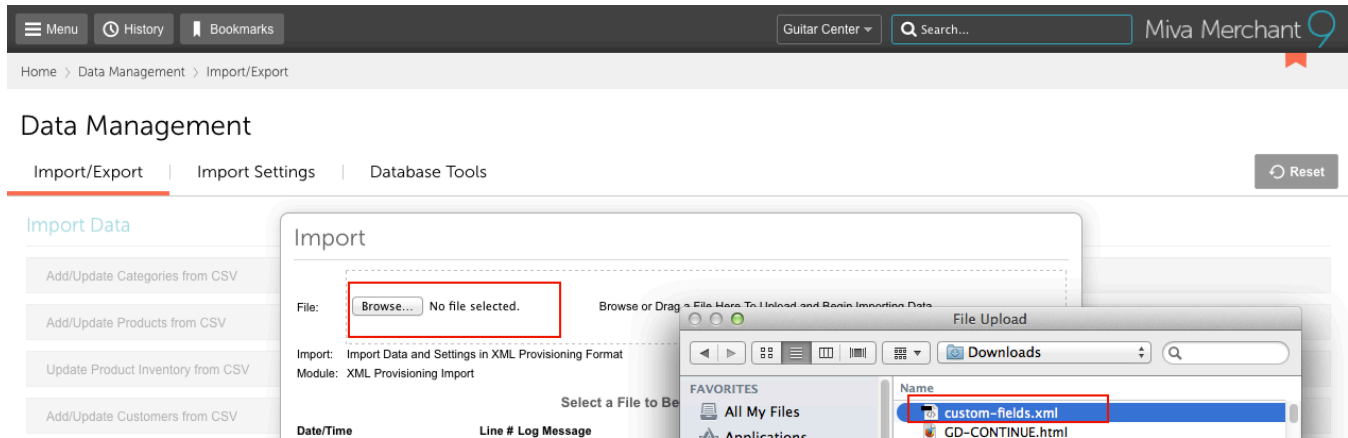

9. Go to Menu, then scroll down to "Data Management"

10. Under "Import/Export" and Select "Import Data and Settings in XML Provisioning Format"

## 11. Upload “custom-fields.xml” from your downloads file

The screenshot shows the Miva Merchant Data Management interface. The top navigation bar includes a menu, history, and bookmarks, along with a search bar and the Miva Merchant logo. The breadcrumb trail indicates the current location: Home > Data Management > Import/Export. The main heading is "Data Management", with sub-sections for "Import/Export", "Import Settings", and "Database Tools". A "Reset" button is visible in the top right corner.

On the left, the "Import Data" section lists several options: "Add/Update Categories from CSV", "Add/Update Products from CSV", "Update Product Inventory from CSV", and "Add/Update Customers from CSV".

The central "Import" window is active, showing a "File:" field with a "Browse..." button and the text "No file selected.". Below this, it specifies the import format: "Import: Import Data and Settings in XML Provisioning Format" and "Module: XML Provisioning Import".

A "File Upload" dialog box is overlaid on the "Import" window, showing the "Downloads" folder. The file list includes "custom-fields.xml" (highlighted) and "GD-CONTINUE.html".
