

# Miva Merchant 9

## TEMPLATE SEARCH AND REPLACE

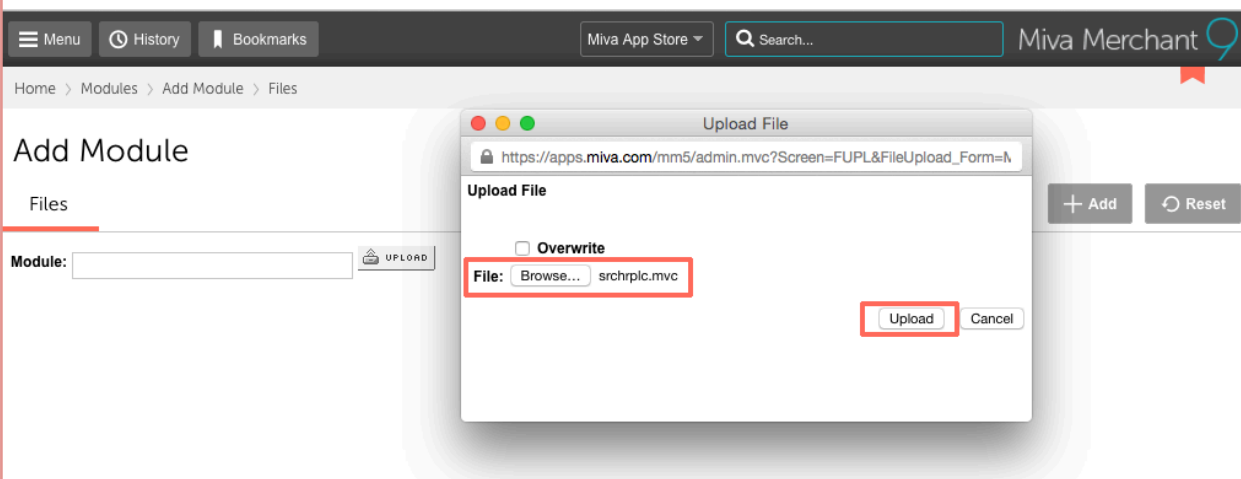

Updated April, 2015

# Template Search and Replace Page

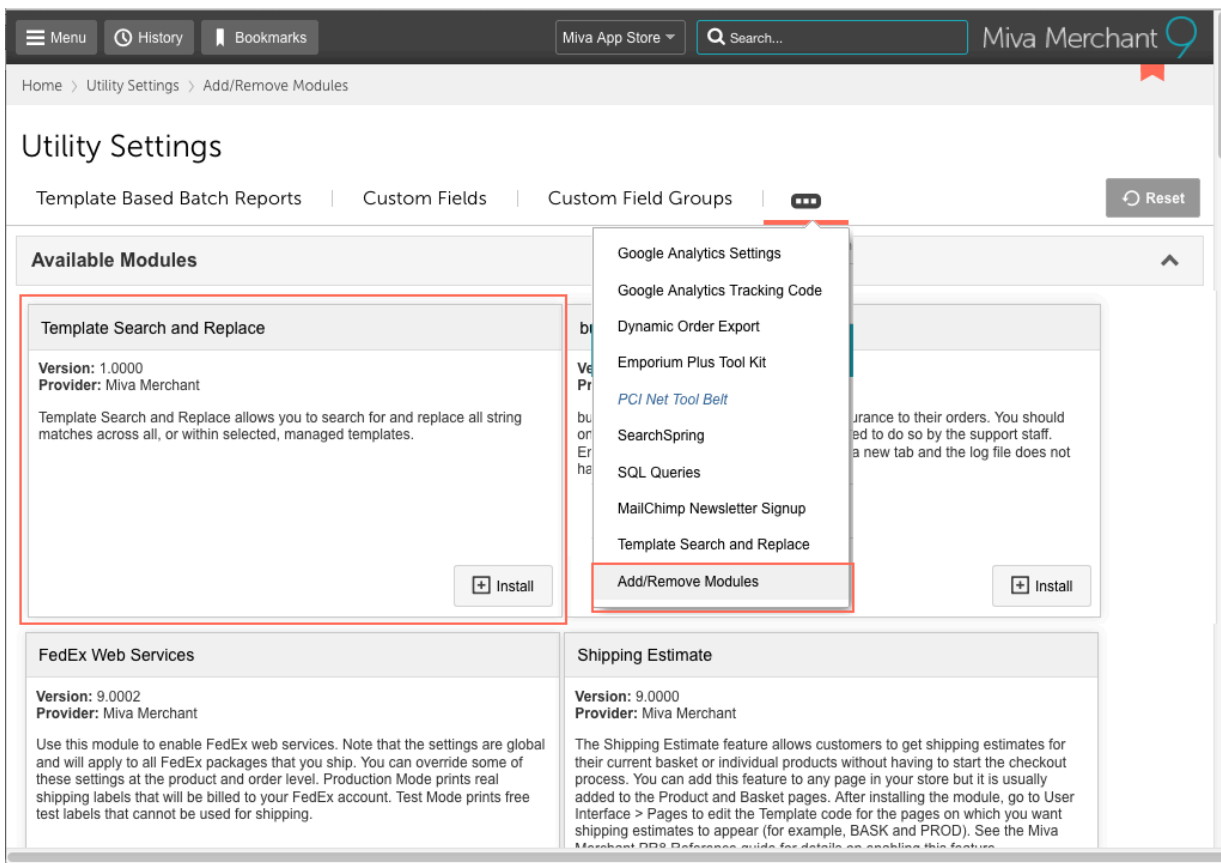

1. Click on “Menu,” then scroll down to “Modules” and click the “+” sign

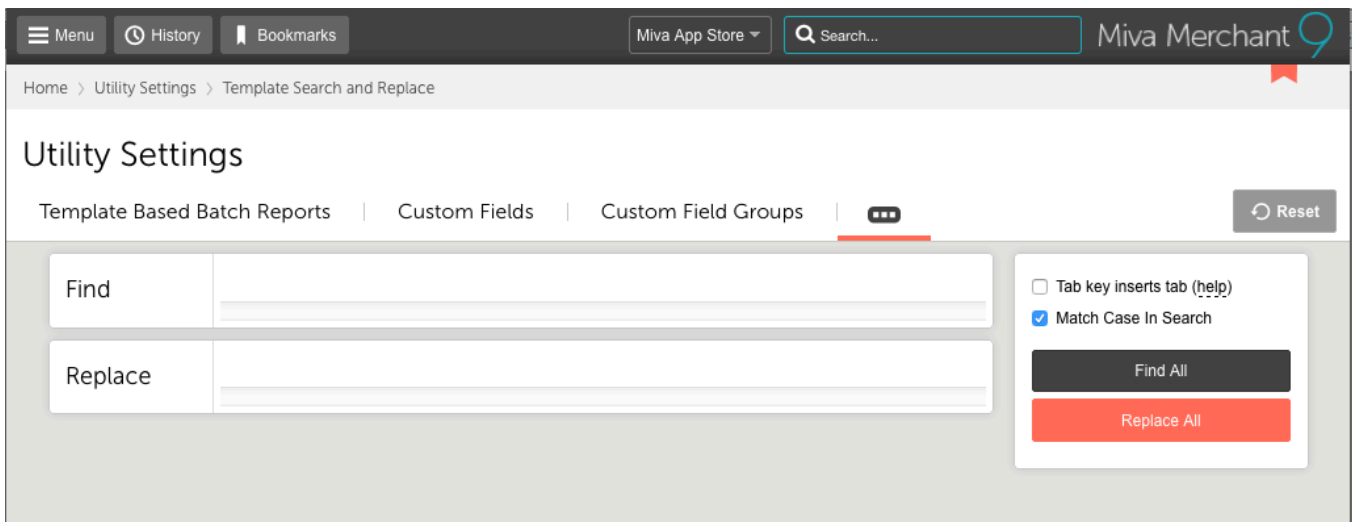

2. Click the “Upload” Button, navigate to the “srchrplc.mvc” Module and click “Upload”

3. Click on “Menu” and scroll down to “Utilities.” Click on the “...” and scroll down to “Add/Remove Modules.” Locate the module “Template Search and Replace” and click “Install.”

4. You will now see your “Search and Replace” utility window where you can search for and replace all string matches across all, or within selected, managed templates.

## How it works:

1. Enter items you want to search for and replace, and hit "Find All" - Verify the correct items were found and then click "Replace All."

Home > Utility Settings > Template Search and Replace

### Utility Settings

Template Based Batch Reports | Custom Fields | Custom Field Groups | Google Analytics Se

Find: `<mt:assign name="g.totalPayment" value="hide" />`

Replace: `<mt:assign name="g.totalPayment" value="display: none;" />`

Find Results

opay

```
<mt:if expr="g.AmountType EQ 'total'">
  <mt:assign name="g.totalPayment" value="hide" />
</mt:if>
<div id="payment-additional" class="&mt:global:totalPayment;">
```

Tab key inserts tab (help)

Template	# of replacements
opay	1

Total Replacements: 1

3. If your search has found more items than you need, you can uncheck particular searches and click on the “Replace Selected” button to the right. This will only replace the items you have checked.

The screenshot shows the 'Utility Settings' interface for 'Template Search and Replace'. At the top, there is a navigation bar with 'Menu', 'History', and 'Bookmarks' on the left, and 'Shoes n Stuff' and a search bar on the right. Below the navigation bar is a breadcrumb trail: 'Home > Utility Settings > Template Search and Replace'. The main heading is 'Utility Settings', with sub-sections: 'Template Based Batch Reports', 'Custom Fields', 'Custom Field Groups', and 'Google Analytics Se'. The search interface includes a 'Find' field containing 'product' and a 'Replace' field. On the right side, there are checkboxes for 'Tab key inserts tab (help)' and 'Match Case In Search', and three buttons: 'Find All', 'Replace All', and 'Replace Selected'. The 'Find Results' section shows two items checked with red boxes: 'cssui-global-footer' and 'sfnt-content'. Each item displays a preview of its HTML code. The 'cssui-global-footer' results include code for a newsletter sign-up form and a list of links. The 'sfnt-content' results include code for product detail buttons.

4. Tab key inserts tab (help) - You can check or uncheck this box depending on how you want to tab through the search boxes. If it's checked, it will tab within it's own box. If unchecked, it will tab between the text fields.

The screenshot shows a web interface for search and replace. At the top, there is a navigation bar with 'Menu', 'History', and 'Bookmarks' buttons, a user profile 'Shoes n Stuff', and a search bar. Below this is a breadcrumb trail: 'Home > Utility Settings > Template Search and Replace'. The main heading is 'Utility Settings', with sub-sections: 'Template Based Batch Reports', 'Custom Fields', 'Custom Field Groups', and 'Google Analytics Se'. The search and replace tool is displayed with a 'Find' field containing 'product' and an empty 'Replace' field. On the right, there are checkboxes for 'Tab key inserts tab (help)' (checked and highlighted with a red box) and 'Match Case In Search' (checked). Below these are three buttons: 'Find All' (black), 'Replace All' (red), and 'Replace Selected' (red).
