# Setup

## Requirements

- Miva Merchant: **10.11.00** or higher

## Installation

1. Log into your Miva Merchant Admin
2. Navigate to **Domain Settings Screen > Modules tab**
3. Click **Add Module** button
4. Click **Upload** and upload **purolator.mvc**
5. Press the **Add** button
6. Navigate to **Modules**
7. Look for **Purolator** and click **Install**
8. The **Purolator** Module is now installed!

## Settings

1. Navigate to **Shipping Settings Screen > Purolator tab**
2. Configure *Settings* tab with your preferences
3. Set up your credentials in *Credentials* tab
  - Use the module key that was provided to you when you purchased the module, or if you do not have it, please contact me by email:  
[hello@pashamoroz.com](mailto:hello@pashamoroz.com)

- All other fields must be obtained via the Purolator API:

<https://www.purolator.com/en/services/technology-solutions/e-ship-web-services>

4. Enter your address; this will serve as the sender's address.

- You can enable **Label Address**, if you want see different address on labels that will be generated by **Purolator**

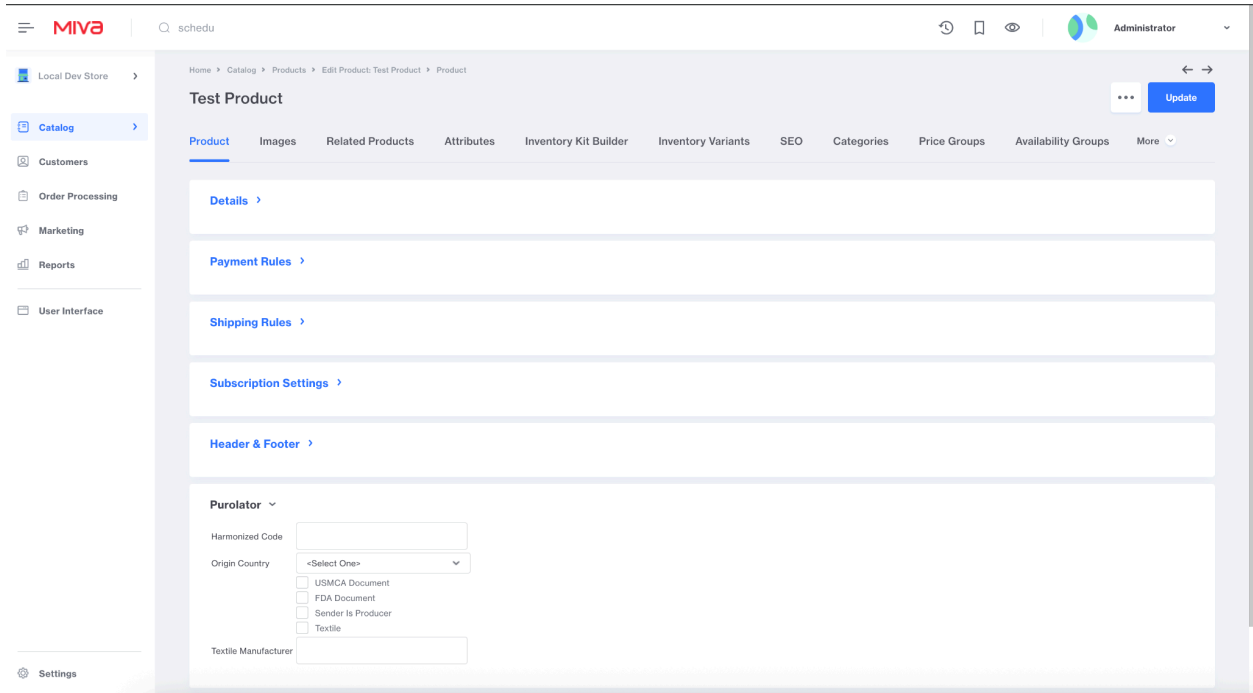

5. Enable **Services** that you want to use in your store.

The screenshot shows the Miva Shipping Settings page, specifically the Purolator tab. The page is divided into several sections: Settings, Classification, Address, and Methods. The Settings section includes fields for Payment Type, Bill Number, Account Number, Ship Country, Ship Type, and Ship Type. The Classification section includes fields for Account Number, API Key, and Ship Type. The Address section includes fields for Name, Street Address, City, State, and Postal Code. The Methods section includes a list of services with checkboxes for enabling or disabling them.

## Product Fields

Additional product information is required for international shipments. You can add this information on the product screen. To do so, follow these steps.

1. Navigate to **Edit Product** screen.
2. Look for **Purolator** fields.
3. Edit or add fields.
4. Click **Update** button to update product.

## Shipping Rates Calculations

1. Go to a merchant store.
2. Add some products to your card
  - Make sure product has correct dimensions and weight
3. Checkout with selected products
  - For testing purposes, log in as a test user and add credits for this test user.
  - Or use the cash on delivery payment method.
4. On **Shipping Method** selection page you will see rates from **Purolator**.

## Label Generation

Once an order has been placed in your store, you can create a shipment and generate labels for your packages. To do this, follow the steps below.

1. Navigate to **Order Processing** screen
2. Select the orders for which you want to create a shipment.
3. Click **Three dots** button
4. Select **Create Shipment** option
5. Go to **Shipments** tab
6. Select **Order** and click **Generate Shipping Label**
7. Setup packages settings there.
8. Click **Generate** button. Done!
9. After that, you will receive a tracking code and a link that will take you to a label that you can print out.

**Generate Shipping Label**

## Logs

Before launching the Purolator module in production mode, you must check and compare the logs in test mode. On the "Delivery Settings" screen > 'Purolator' tab, there is a "Logs" button. Click this button to open a dialog box with information about the data sent to Purolator and any issues. Payload that sent to the purolator is in XML format. I recommend you use [online tools](#) that will show you this data in pretty format so you can compare it on your own.

## Support

For additional support or assistance with installation and configuration, please contact me by email: [hello@pashamoroz.com](mailto:hello@pashamoroz.com).
